

Yuhang Dong

Email: yuhang.dong@fau.de Tel: +49 15255910634

Education Background

Friedrich-Alexander-Universität Erlangen-Nürnberg	Oct.2024 ~ Now
Major: Data Science	Degree: Master of Science (student)
Southern University of Science and Technology (SUSTech), China	Sep.2020 ~ Jul.2024
Major: Computer Science and Technology	Degree: Bachelor of Engineering
National University of Singapore	May.2023 ~ Jul.2023
Web Mining (Non-Degree Courses)	Grade: "A" Performance and Third Prize

Research Interests

Generative AI/LLM, Deep Learning, Data Mining, Computer Vision

Research Experience

Analysis the Impact of LLMs in Academic Papers (Publish in progress)	Sep.2025 ~ Now
Conducted data scraping and data mining on massive academic papers to analyze and model the evolving usage patterns of terminology. Performed data modeling and collaborated with a PhD researcher on mathematical formulas. GitHub: https://llm-impact.github.io arXiv: Geng, M., Dong, Y., & Poibeau, T. (2026). Beyond Via: Analysis and Estimation of the Impact of Large Language Models in Academic Papers. arXiv:2603.25638.	

Project Experiences

Route Planning for Driverless in Formula Student Germany	Jan.2025 ~ Apr.2025
Reproduced a paper using Genetic Algorithms to plan the optimal route for the vehicle to pass through a curve. Engineered and embedded the Python algorithm into the ROS2 operating system on the vehicle computer. Achieved real-time performance by processing on-board camera position data to calculate the optimal route within a strict 100ms constraint, handling the required I/O with ROS2, which was maintained by teammates.	
GitHub Open-Source Project - Voting Website	Aug.2023 ~ Aug.2025
Designed a voting website for a mobile game, so that players could vote for their favourite characters and view the voting results simultaneously. Analyzed 10+ million votes to show character popularity and maintained the high-traffic back-end and deployment. Communicated with netizens on the forum and processed feedback. GitHub: https://github.com/ArknightsVote/ArknightsVote website: https://vote.ltsc.vip/	
Data Mining of Electric Vehicle Trajectory	Jul.2022 ~ Jun.2024
Analyzed the timestamp and position, inferred the Points of Interest (POI) of the vehicles, drew the hourly state transition diagram, recognized the behavior patterns of the vehicles, and finally inferred the potential charging demand. Utilized a variety of charts to show results automatically through ECharts. Collaborated with a teammate who focused on developing the front-end visualizations.	

Work Experiences

Assistenz im Sprach- und Kulturbereich in Konfuzius-Institut Nürnberg-Erlangen	Apr.2026 ~ Now
Maintain web pages, computer systems, and other electronic equipment, migrate the library management database, draft equipment usage guidelines, and take photographs and draft content for event promotion.	

Professional Skills

Languages: English (proficient), German (basic), Chinese (native)
Programming Languages: Python (proficient), Java, C++, JavaScript, and PostgreSQL
Software: git, pip, pytorch, anaconda, ssh, ubuntu, and markdown.

Scholarship and Awards

Honorary title of "Outstanding Student" of SUSTech	Jan.2024
National Encouragement Scholarship	Oct.2021 & Oct.2023
Third prize, The 4th SUSTech Programming Competition	Dec.2021
